CLAIM AMENDMENTS

1. (currently amended) A sign, in particular including an information sign, said sign having a main body (1) and a transparent cover (5), connected detachably with the main body (1), for a sheet-form information carrier (4) suitable for accommodation between the main body (1) and the cover (5), and ; said sign having means for securely holding together the main body (1), the cover (5) and the information carrier (4), the main body (1) being provided with guide grooves (2, 3) for the cover (5), characterized in that wherein the main body (1) additionally comprises, between its side edges thereof in each case forming a common guide groove (2, or 3 respectively) for mutually opposing edges of the cover (5) and the information carrier (4), at least one undercut groove (6) extending parallel to and at a distance from the guide grooves (2, 3) of the main body (1), said additional undercut groove (6) serving to accommodate accommodating at least one clamping slide (15), the an end of which said at least one clamping slide (15) remote from the center of the undercut groove (6) forms forming a holder for one of the longitudinal edges edge of the panel form planar cover (5) and of the information carrier (4) not engaging in the guide grooves (2, 3).

Claim 2. (currently amended) The sign as claimed in claim 1, characterized in that a wherein one said clamping slide (15) for the edges of the covering panel cover (5) and of the

information carrier (4) not engaging in the guide grooves (2, 3) is associated with each of the two ends of the undercut groove (6).

Claim 3. (currently amended) The sign as claimed in claim 1, characterized in that its wherein said main body (1) takes the form of a portion of an extruded profile.

Claim 4. (currently amended) The sign as claimed in Claim 1, characterized in that wherein the undercut groove (6) forms a rectangular channel open toward the front of the sign.

Claim 5. (currently amended) The sign as claimed in Claim 1, characterized in that wherein the main body (1) is provided at its rear with ribs (13) extending parallel to the guide grooves (2, 3).

Claim 6. (currently amended) The sign as claimed in claim 5, characterized in that the wherein a rear wall (7) of the undercut groove (6) projects slightly beyond the free ends (14) of the ribs (13).

Claim 7. (currently amended) The sign as claimed in Claim 1, characterized in that the wherein a rear wall (7) of the undercut groove (6) is provided with holes (8, 9) for fastening screws (11).

Claim 8. (currently amended) The sign as claimed in claim 7, characterized in that wherein the holes (8, 9) take the form of slots offset relative to one another by 90°.

Claim 9. (currently amended) The sign as claimed in claim 7, characterized in that wherein portions (18) of the clamping slides (15) introducible into the undercut groove (6) form covers for the holes (8, 9) and for the heads of the fastening screws (11).

Claim 10. (currently amended) The sign as claimed in Claim

1, characterized in that wherein the clamping slides (15)

comprise narrow webs (17) engaging over the edges of the covering panel cover (5).

Claim 11. (currently amended) The sign as claimed in Claim 1, characterized in that wherein the clamping slides (15) rest via clamping webs (19, 20) against inner walls of the undercut groove (6).

Claim 12. (currently amended) The sign as claimed in Claim 1, characterized in that wherein the clamping slides (15) take the form of injection molded parts of plastics material.

Claim 13. (currently amended) The sign as claimed in Claim 1, characterized in that wherein at least one said clamping slide (15) is provided, in the area of its said end forming the holder.

with a display panel (23) which can be swiveled to and fro between two positions.

Claim 14. (currenty amended) The sign as claimed in claim 13, characterized in that wherein the end of the clamping slide (15) forming the holder is constructed in the manner of a plate (16), which comprises said plate comprising at its a rear edge thereof a bearing block (24) for the display panel (23).

Claim 15. (currently amended) The sign as claimed in claim 13, characterized in that wherein only the an end of the clamping slide (15) projecting beyond the a top edge of the main body is provided with a said display panel (23).

Claim 16. (currently amended) The sign as claimed in Claim 13, characterized in that wherein in one of its end positions, the display panel (23) covers the an end of the clamping slide (15) projecting beyond the main body (1).

Claim 17. (currently amended) The sign as claimed in claim 2, characterized in that its wherein said main body (1) takes the form of a portion of an extruded profile.

Claim 18. (currently amended) The sign as claimed in claim 8, characterized in that wherein portions (18) of the clamping slides (15) introducible into the undercut groove (6) form covers

for the holes (8, 9) and <u>for</u> the heads of <u>the</u> fastening screws (11).

Claim 19. (currently amended) The sign as claimed in claim 14, characterized in that wherein only the an end of the clamping slide (15) projecting beyond the a top edge of the main, body is provided with a said display panel (23).

Claim 20. (currently amended) The sign as claimed in Claim 14, characterized in that, wherein in one of its end positions, the display panel (23) covers the an end of the clamping slide (15) projecting beyond the main body (1).

.)
